

Dear FCC

I would like to state my opinion on NAB's petition 04-160. I have been an XM listener for about a year now and really enjoy a lot of the programming that they have. I drive a truck and it is nice not having to search for a channel that I like in every city that I roll into. It is also nice to be able to listen to the same station from coast to coast if I like. It is also nice to have the traffic channels. I can dial up the city that I'm going into and be able to plan my route an hour or two before going into that city. If the traffic is backed up on my usual route it is nice to know so that I can change and not be delayed much more than I have to. So please reject this petition that the NAB has.

Respectfully

Doug Kern
